Is the brother mfc-240c printer wireless

60 Discontinued The Brother MFC-240C is a technologically advanced multifunction device that comprises printer, scanner, copier, and fax machine. This printer uses the Color Inkjet Technology that can print pages in their true colors. It can print up to 20 color pages and 25 monochrome pages per minute, at up to 1200 x 6000 dpi to ensure clear and crisp prints. It has a built-in 16 MB memory that ensures more number of documents in print queue. This printer features a built-in media card slot and is PictBridge compatible that allows you to print images directly from a compatible digital camera.The fax module ensures a transmission speed of less than 6 seconds. It can store up to 40 Total Auto Dial Locations and store up to 200 pages in its fax memory, and produce color fax copies. The copier module can produce 18 black and 16 color copies per minute. The scanner module can scan in both B/W and Color. This scanner can scan with a resolution of up to 600 x 2400 dpi. It features an automatic document feeder that enables a user to fax, scan or copy multiple pages quickly and easily.Breakthrough PerformanceThe Brother MFC-240C features a breakthrough 25 ppm black and 20 ppm color print speed for efficient home or home office printing.Great Print QualityWith a print resolution of up to 6000x1200 dpi, the printer produces crisp, clean and lifelike images and documents in exceptional detail.All-in-one CapabilityThe printer features both B/W and color copying, scanning and faxing for great versatility.USB 2.0 ConnectivityThe convenient Hi-Speed USB 2.0 connectivity ensures rapid set-up of the printer and fast data transfer.PictBridge SupportedPictBridge technology enables direct picture printing from a PictBridge-enabled camera without the need for a computer. How do I connect my Brother printer to my computer? Add your printer to your computer on Windows 10 Turn on your printer. On your keyboard, press the Windows logo key and click the Settings button. Select Devices. Select Printers & scanners, and then click Add a printer or scanner. Select the printer you want and click Add device. How do I connect my Brother printer to my computer wirelessly? Set up the wireless connection manually with the printer driver installed (For Windows) Make sure that the printer driver, Printer Setting Tool, and P-touch Editor are installed on your computer. Turn on the printer. Make sure the printer's Wi-Fi LED is flashing. Connect the printer to the computer with a USB cable. Does Brother MFC 240C support Windows 10? painful is it not? According to Brother's website, your printer isn't supported on Windows 10. That means Brother hasn't updated the driver to keep up with the changes to Windows 10, and they haven't tested your printer on Windows 10. How do I connect my Brother MFC j480dw to my laptop? Turn your Brother machine on. Press Menu or Settings.2. Set up a Brother machine on a wireless network Select Network. Press OK. Select WLAN. Press OK. (This step might be skipped in some models.) Select Setup Wizard. Press OK. How do I connect my Brother printer to my computer without the CD? Brother Printer Installation with USB Cable Plug in the printer, and switch it on. Now, insert the USB cable in the USB jack of computer and printer. On the computer, go to start button and click it. Now click on devices and printers. On the top there is an option, Add a printer. Is the brother mfc 7360N Wireless? The Brother MFC-7360N doesn't have wireless networking, which we were hoping for on a printer costing \$349. Where do I find the WPS PIN on my Brother printer? Press Network. Press WLAN. to display WPS w/PIN Code, and then press WPS w/PIN Code. The LCD will show an 8 digit PIN and the machine starts searching for an access point for 5 minutes. Why is my Brother printer not discoverable? Verify that all devices on the network where your PC and the Brother machine are connected work correctly. Turn off the Brother machine and turn it back on. The built-in network card may not work for some reason. Turn off the Brother machine and turn it back on, this will reset the network card. How do I connect my Brother MFC to WiFi? To set up your Brother machine on a wireless network: Connect the power cord to your Brother machine and then connect it to an electrical socket. Press Menu button on the machine's control panel. Press the Up or Down arrow key to select Network and press OK. Press the Up or Down arrow key to select WLAN and press OK. How do I connect my Brother MFC 9340cdw printer to my WiFi? To set up your Brother machine on a wireless network: Connect the power cord to your Brother machine and then connect it to an AC power outlet (electrical socket). Turn your Brother machine on. (Settings) or Menu > All Settings > Network > WLAN > Setup Wizard. How do I connect my Brother MFC 6490CW to my computer? How to connect Brother MFC-6490CW/MFC-6890CDW printer to pcWRT wifi Press Menu. Press Δ or ∇ to choose Network . Press Δ or ∇ to choose WLAN . Press Δ or ∇ to choose Setup Wizard . The printer will search for your network and display a list of available SSIDs. Use Δ or ∇ to choose the authentication method, and press OK. Are Brother printers compatible with Windows 10? Most Brother models offer support for Microsoft® Windows 10. When using your Brother machine in Windows 10, you must use the driver/utility that is compatible with Windows 10. How do I make my Brother printer discoverable? Press and hold the Wireless Mode button for one second to turn on the wireless mode. When the Wi-Fi LED is lit, release the Wireless Mode button. Connect the printer to the computer with a USB cable. Start the Printer Setting Tool on the computer, and click [Communication Settings]. How do I connect my Brother scanner to my computer Windows 10? Click Start → (All apps). Click Windows System. Click Control Panel. Click View devices and printers. Click Add a printer. Select your Brother printer from the list and then click Next. On the "Install the printer driver" screen, choose Brother from the Manufacturer list. How do I get my Brother printer to scan to my laptop? Scan a document in Windows 8 or later. Click Windows System. Click Windows Fax and Scan. Click New Scan. If you have multiple imaging devices installed on your computer, choose your scanner and click OK. Set scanning options, and then click Scan. The scanned image will be displayed. How do I hook my printer up to my laptop? Simply plug the USB cable from your printer into an available USB port on your PC, and turn the printer on. Select the Start button, then select Settings > Devices > Printers & scanners. Select Add a printer or scanner. Wait for it to find nearby printers, then choose the one you want to use, and select Add device. How do I connect my MFC L2700DW to my computer? How to setup wireless connection for your Brother MFC L2700DW printer: Turn your Brother MFC L2700dw on. Press the 'Menu' button. Select 'Network' and press 'OK'. Select 'WLAN' and press 'OK'. Select 'Setup Wizard' and press 'OK'. Select 'Yes' to 'WLAN Enable?' Select your Network Name (SSID) and press 'OK'. How do I setup my brother mfc-7360N wireless printer? To view the Quick Setup Guide in other languages, please visit . 1 Unpack the machine and check the components. 2 Remove the packing. 3 Load paper in the paper. 4 Connect the power cord. 5 Choose your language. 6 Choose the correct Receive Mode. 7 Set the LCD contrast. 8 Set the date and time. What kind of printer is brother mfc-7360N? The Brother MFC-7360N Network Monochrome All-in-One Laser Printer allows you to print, scan, fax, and copy all from one unit. Brother TN-450 Black Toner Cartridge, High Yield is eco-friendly MFC-7360N Toner Cartridge and starts at \$55.49. 23 reviews Brother MFC-240C Printer MFC240C Reviews We have had this Brother Printer-Copier-Scanner-Fax forever and a day. And it still works. We really mostly use the fax machine anymore, since our newer model all-in-ones are faster at printing, copying and scanning. But nothing beats this thing for reliable faxing. This is an oldie goldie phone modem fax machine. Just use the document loader, plug in your fax number, and listen to the old-timey fax noises as your fax is sent on its way. You will have time to get a cup of coffee while waiting for the fax to finish but it is sooooo much more reliable than the newer versions. Your fax will arrive at its destination, trust. And after all this time it still works! I love it! Oh please never break, Intellifax. e!7? USA 2017-01-24 true It has all the functions I need and I got a really good price for it, but it lacks the user interface of hp all in one printers.I hope the will get there soon, int he mean time I do appreciate Brothers effort.also there is a weird pop up error on Mac OS computers when you turn the computer on and brother is saying is Apple's fault but they are the ones who wrote the driver hyve5x Fresno, CA 2011-11-09 true I bought some online, off brand, cheap ink for my Brother printer and it glombed it up so bad I actually had to send it back to the manufacturer and ultimately had to replace it on an exchange basis. Fortunately, they didn't charge me anything but I did have to do without my printer for about two weeks. Texas-Vietnam-Vet Beaumont, TX 2011-11-09 true The Brother MFC-240C is the best printer I have ever owned. I have tried several different brands, and none compare with the quality and easy use of this printer. The pages come out perfect every time, no jams or problems. The machine is self cleaning & "tells" you when there is a problem such as low ink in a particular color. Changing the ink cartridges is SO EASY. I would recommend this brand to anyone who is tired of the problems of poor quality printing & hard to use products....too many of them I have tried in the past. ChrisNC8 Weaverville, NC 2011-08-09 true We purchased this printer mfc240 just over a year ago and it has been a very good investment ever since. The user friendly installation was very simple. We love the built in options that come with this printer such as ease of replacing the ink cartridges, wire tracks that hide the excess wire, the stands that hold the top of the printer for adjusting settings. Even though it has four color cartridges they are inexpensive and are very easy to lock in to place. the model is not the smallest of space takers but not so big that it fits in most printer slots for our desk. We also enjoy the ease of using our memory card from our camera on the printer, the slot is located on the front and the extra usb port is on the front also. Faxing is simple as well backlighting helps you see the numbers that you have dialed and the choice of using just black or color option is great.The manufacture is brother and is a very good product and name brand that is known in the pc industry. Overall I would recommend this all in one product to family and friends. jlc513 Commerce, CA 2011-08-09 true Constantly jams if printing more than two pages at a time. if any ink runs out cannot print in any of the remaining colors. Cannot print card stock or Avery business cards or any perforated paper template paper from Avery, without jamming. When jams, must repeat the unjamming process (remove cover, reload paper) consecutive times for the printer senses it's done. I bought it because I was pleased with my Brother laser printer. never buy another Brother again, it appears they cheapened the construction. Now, I support Epson, especially because they have a through-feed system that doesn't require the paper to be turn around for printing. Inventnow Essex, MD 2011-05-10 false I have had this printer for a while, and I haven't really had a problem with it. I like that I can copy, fax, or print with it. It is small and easy to use, and prints documents well. I think it is quite fast when copying, printing, and scanning, although I don't do a lot of high bulk printing. During the few times that paper has jammed in the printer, it was very easy to fix, as the top of the printer lifts up without any problem. Faxes can also be fed directly into the top of the printer, and so I've found the fax function also easy and fast. The only thing I don't really like about the printer is the fact that the buttons on the front stay lit. My printer is in my room, and so I have to cover them up with something before I go to sleep, as the light bothers me a bit. cms3688 Waterford Works, NJ 2011-03-12 true I was smart and bought 2 of these Brother MFC 240 C one for myself and one for my daughter in college. This means I can buy ink in bulk and we have ink on hand andready to use. I do a lot of printing so I have actualy work out one printer. Poor thing : ^) I did have insurance on my printers when one malfunctioned I Brother replaced it no quetions asked. At first I wasn't sure I liked the separate cartridges for each color but I quickly learned it was a great cost saver. When one color runs out I don't have to replace the entire color cartridge just the one that needed replaced ! The scanner & fax capabilities are wonderful and give good clear scans or copies. I love my Brother All in one MFC 240 c multifunction printer/ scanner/ copier & fax. Printing commands are simple and there is an access door in the rear of the unit that gives you access to clear any paper jams. If I had to say any negative about this unit it would be that it does get paper jams. **** MyFunnyFarm42 Myrtle Point, OR 2011-03-11 true The **Brother MFC-240C Printer** is the worst printer I ever had. It is way too bulky and has too many cons. The Brother Printer comes with 1 color ink carthrage for all colors. It can copy, print, and fax. The reason why I don't like this printer is because it has the usb inside the printer where it comes out, which gets tangled and hard to use. Also, there is no wifi connection from the printer to the computer. The Printer is too bulky and wastes ink really fast as well as paper. **The Pros:** Does the job (inefficiently). Fax, printer, and copy machine. Cheap **The Cons: **Takes a while starting up as well as the printer has to clean the ink for some reason and that stalls 5 to ten minutes of your time. The paper gets jammed sometimes and takes a while to print something out. Also, you have to press the power button for a long time to turn it up. Every single thing I do with this printer stalls my time. **Overview:** This printer takes a lot of my time when I have to print something up for a project and don't have a lot of time so I give this a 2 stars because there is no (technical) problems with it and does the job (slowly). I do not recommend this printer, I prefer lexmark printers over Brother printers. kllp101 Los Angeles, CA 2011-01-30 false This printer is not the best printer to own. I have used this printer for so many things and several times, it disappointed me alot. It loses signal to my laptop because it is wirelessly connected to several laptops and I do not understand how several laptops can lose signal to it. Its kind of annoying when scanning because the scanning feature isnt the best in my opinion. Its annoying to navigate through because its not that simple where you can click one button and it does it all for you. It takes a while sometimes but it doesnt have many paper jams and that is very important for me. It also prints fine and tells the user about hte level of the ink. Its good and bad at the same time. I dont like the other features it has because i always have difficulty when i use them. Faxing is not something im good at but scanning is sometimes easy when its figured out but other than that it can give a little trouble. hannahsammer Oak Lawn, IL 2010-12-31 true 78.3
